ABOUT THIS DOCUMENT

This brand guideline document captures the visual identity system extracted from satiwagin.com. It defines the complete design language including colors, typography, spacing, layout rules, and UI component specifications needed to reproduce the Satiwa brand consistently across any digital platform or website.

SOURCE

Extracted from **satiwagin.com** (Astra Theme + Elementor Page Builder, WordPress). The site is a single-page landing design for Satiwa Hemp Craft Gin, a premium gin brand featuring hemp-based botanical ingredients.

O1 BRAND OVERVIEW

BRAND NAME

Satiwa — Hemp Craft Gin. A premium craft gin brand that distinguishes itself through the use of hemp as a key botanical ingredient. The brand identity conveys a sense of natural sophistication, earthy authenticity, and artisanal craftsmanship.

BRAND PERSONALITY

The Satiwa brand blends a deep connection to nature with a modern, clean aesthetic. The dominant dark greens in the design palette evoke hemp fields and natural botanicals, while the clean white backgrounds and sharp typography communicate premium quality and contemporary craftsmanship. The overall visual language is restrained and confident, avoiding unnecessary decoration in favor of bold simplicity.

DESIGN PHILOSOPHY

The Satiwa website follows a full-width, section-based single-page layout. Each content block occupies the full viewport width, separated by generous white space or bold colored sections. The design leverages large hero imagery, clean sans-serif typography for body content, and distinctive custom display fonts for headings. The color palette is deliberately minimal, anchored in deep forest greens and a single blue accent, creating a cohesive and memorable visual identity that communicates both natural authenticity and refined quality.

TECH STACK

Platform	WordPress 6.0.11
Theme	Astra 3.9.1
Builder	Elementor 3.7.8
Layout	Single-page, full-width
Max Width	1240px

KEY CHARACTERISTICS

Style	Clean, modern, nature-inspired
Mood	Earthy, premium, artisanal
Layout Pattern	Full-width stacked sections
Border Radius	2px (buttons), 4px (cards)
Footer	#EEEEEE background

02 COLOR PALETTE

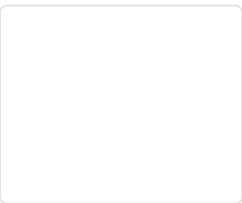

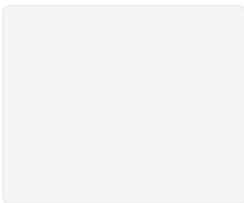

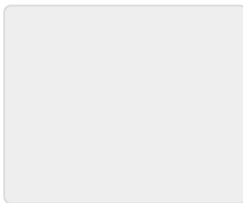

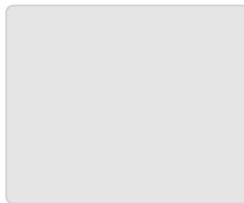

PRIMARY COLORS

The primary color palette is built around a deep forest green that anchors the brand in its natural, hemp-based heritage, paired with a strong blue accent used for interactive elements and calls-to-action throughout the site.

				
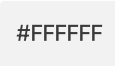

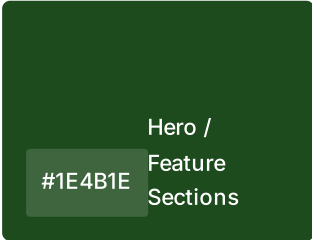

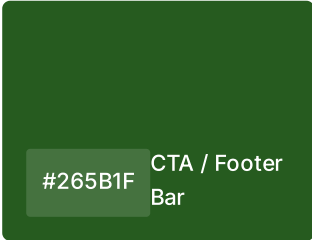

FOREST GREEN	DEEP GREEN	BRAND BLUE	SAGE	CHARCOAL
#1E4B1E	#265B1F	#0170B9	#C0C4AA	#4B4F58
Sections, hero overlays	Footer bars, CTA sections	Links, buttons, accents	Borders, subtle accents	Body text

NEUTRAL & BACKGROUND COLORS

These colors form the canvas and supporting palette. White serves as the primary background for content areas, while the light grays provide subtle differentiation between sections and UI elements.

				
WHITE	LIGHT GRAY	FOOTER GRAY	BORDER GRAY	DARK GRAY
#FFFFFF	#F5F5F5	#EEEEEE	#E5E5E5	#3A3A3A
Primary background	Secondary backgrounds	Footer background	Borders, dividers	Headings, hover states

SECTION BACKGROUND USAGE

			
#FFFFFF	#1E4B1E	#265B1F	#EEEEEE
Content Sections	Hero / Feature Sections	CTA / Footer Bar	Below-Footer

03 TYPOGRAPHY

FONT FAMILIES

The Satiwa brand uses a carefully curated combination of custom and system fonts. Two custom fonts (Bahnschrift and Picnic Caps) are self-hosted via TTF uploads, while the body text relies on the standard system font stack. Google Fonts Roboto and Roboto Slab are loaded but serve a supporting role.

HEMP
CRAFT GIN

PRIMARY HEADING

Bahnschrift (self-hosted TTF)

Weights used: 100, 500, 600

Role: Primary heading font for section titles, hero text on dark backgrounds, and prominent display headings. Always set in UPPERCASE with generous letter-spacing (1.5px) for a commanding, modern look.

Quick Links

DECORATIVE

Picnic Caps (self-hosted TTF)

Weight: 400

Role: Decorative display font used sparingly for footer section headings like "QUICK LINKS" and "FOLLOW US". Provides a casual, handcrafted feel that contrasts with the structured Bahnschrift headings.

The craft of gin-making meets the natural purity of hemp botanicals.

BODY

System Font Stack

-apple-system, BlinkMacSystemFont, 'Segoe UI', Roboto, Oxygen-Sans, Ubuntu, Cantarell, 'Helvetica Neue', sans-serif, sans-serif

Role: All body text, paragraph content, navigation links, buttons, and form elements.

Weight: 400 regular. Provides optimal readability across all platforms.

Roboto + Roboto Slab

SUPPORTING

Roboto & Roboto Slab (Google Fonts)

Loaded via Google Fonts CDN. Both loaded with weights 100-900. Role: Supporting typefaces available for Elementor widgets, fallback headings, and extended text components where the system stack needs a web font alternative.

03 TYPOGRAPHY

TYPE SCALE & SPECIFICATIONS

The following specimens show the exact font sizes, weights, line heights, and letter spacing values extracted from the live Satiwa website. Use these specifications to replicate the exact typographic hierarchy in your implementation.

H2 ON DARK GREEN BACKGROUND

HEMP CRAFT GIN

Bahnschrift / 500 Medium / 40px / Uppercase / 1.5px tracking / Line-height: 40px

H2 ON WHITE BACKGROUND (FOOTER)

QUICK LINKS

Bahnschrift / 600 SemiBold / 20px / Normal case / Line-height: 20px

H2 DECORATIVE (FOOTER)

FOLLOW US

Picnic Caps / 300 Light / 30px / Normal case / Line-height: 30px

BODY TEXT

Body text is set at 15px (1rem) with a generous line-height of approximately 1.86, providing excellent readability for paragraph content.

System Stack / 400 Regular / 15px / Line-height: ~27.86px (1.86 ratio)

LINKS

Nav Links	System Stack	15px	400	#4B4F58	Normal
Copyright	System Stack	15px	400	#4B4F58	Normal

O4 LAYOUT & SPACING

CONTAINER & GRID SYSTEM

The Satiwa site uses a centered container layout with a maximum content width of 1240px on desktop (922px+ breakpoint). Content is constrained within 1200px effective width inside the container. On tablet (below 921px), the layout shifts to a single-column vertical stack, and on mobile (below 544px), spacing is further reduced.

PROPERTY	DESKTOP (1201PX+)	TABLET (545- 921PX)	MOBILE (UP TO 544PX)
Container Max Width	1240px	100%	100%
Content Padding	3em (48px)	3em	2.4em
Block Padding (top/bottom)	3em	3em	3em
Block Padding (left/right)	3em	2em	1.5em
Section Margins	50px 0	50px 0	40px 0
Button Padding	15px 30px	14px 28px	12px 24px
Footer Padding	20px	20px	20px

SPACING SCALE

Key spacing values used throughout the site. The design favors generous vertical spacing to create a clean, airy feel between content sections.

SECTION GAP		50px
CONTAINER PAD		3em (48px)
WIDGET GAP		3.5em (widget margin)
ARTICLE PAD		3em (article padding)
BUTTON PAD-V		15px top/bottom
BUTTON PAD-H		30px left/right

BORDER RADIUS

The site uses very minimal border-radius values, maintaining a clean, angular aesthetic. Buttons use a subtle 2px radius, while Elementor widget containers default to 0px (sharp corners). This gives the overall design a crisp, structured feel consistent with the brand's premium positioning.

05 UI COMPONENTS

BUTTONS

Buttons are a critical interactive element. The primary button uses the brand blue (#0170B9) as background with white text. On hover, the background darkens slightly. The border-radius is a subtle 2px, maintaining the clean angular aesthetic. Padding is generous at 15px vertical and 30px horizontal to create a comfortable click target.

PROPERTY	DEFAULT	HOVER
Background	#0170B9	#3A3A3A (dark gray)
Text Color	#FFFFFF	#FFFFFF
Padding	15px 30px	Same
Border Radius	2px	Same
Font Family	Inherit (system stack)	Same
Font Size	15px	Same
Font Weight	400	Same
Line Height	1	Same
Border	Solid, color matches bg	Border matches bg
Text Transform	None	None
Letter Spacing	Normal	Normal

LINKS

Links use the primary brand blue (#0170B9) without underline decoration. On hover and focus states, the color transitions to the secondary dark (#3A3A3A). This clean approach removes visual noise while maintaining discoverability through color alone.

DEFAULT LINK

[Link Text Example](#)

HOVER / FOCUS

Link Text Example

NAVIGATION

The main navigation menu uses the system font stack at 15px with body-weight text (400). Menu items are vertically centered within the header bar using flexbox. Submenu dropdowns feature a 2px top border in the primary blue (#0170B9). The menu collapses into a mobile hamburger at the 921px breakpoint. The navigation background is transparent by default, allowing the hero section to bleed behind the header for a full-width visual effect.

FOOTER

The footer area consists of two distinct zones: a main content zone on a white background with 30px vertical padding, containing footer column widgets, and a below-footer copyright bar on a #EEEEEE background with 20px padding. Footer headings use a combination of Bahnschrift (600 weight, 20px for content headings) and Picnic Caps (300 weight, 30px for decorative headings like "QUICK LINKS" and "FOLLOW US"). All footer text inherits the standard body color (#4B4F58) at 15px.

06 LOGO & IMAGERY

LOGO

The Satiwa logo is a custom graphic uploaded as a PNG image (1726 × 1396px original dimensions). It appears in the site header (both desktop and mobile), in the footer, and as a branding element throughout the page. The logo features the brand name "Satiwa" in a distinctive type treatment paired with a hemp leaf motif that reinforces the brand's core botanical identity.

IMAGERY STYLE

The website imagery follows a premium lifestyle photography aesthetic. Hero backgrounds use large, atmospheric photographs (such as the gin bottle against a textured backdrop) that fill full viewport widths. Product images are presented on clean white or transparent backgrounds, and feature rounded framing. The overall image style emphasizes natural lighting, artisanal craftsmanship, and the earthy tones of the brand palette.

IMAGE ASSETS DETECTED

The following key images were identified on the site. Product shots use PNG format for transparency support, while hero/banner images use high-resolution JPGs for photographic quality.

IMAGE	FORMAT	USAGE
Satiwa_Logo.png	PNG, 1726×1396	Brand logo (header, footer)
hero-3B-scaled.jpg	JPG, 1280×875	Hero section background
1-03.png / 1-04.png / 1-05.png	PNG, ~313×392	Product bottle shots

1-07.png / 1-08.png / 1-09.png	PNG, ~340×425	Product detail images
1-10.png / 1-11.png / 1-12.png	PNG, ~296×197	Feature/thumbnail images
1-13.png	PNG	Section background texture

07 CSS VARIABLES & TOKENS

ASTRA THEME GLOBAL COLORS

The Astra theme defines a set of CSS custom properties under the `--ast-global-color-*` namespace. These are the single source of truth for the entire color system. All component colors are derived from these variables, making it straightforward to re-theme or customize the palette by modifying only these root values.

```
:root {  
  --ast-global-color-0: #0170B9; /* Primary Blue - links, buttons, accents */  
  --ast-global-color-1: #3a3a3a; /* Secondary - hover states, active links */  
  --ast-global-color-2: #3a3a3a; /* Heading color */  
  --ast-global-color-3: #4B4F58; /* Body text color */  
  --ast-global-color-4: #F5F5F5; /* Secondary background */  
  --ast-global-color-5: #FFFFFF; /* Primary background (white) */  
  --ast-global-color-6: #E5E5E5; /* Border color */  
  --ast-global-color-7: #424242; /* Dark variant */  
  --ast-global-color-8: #000000; /* Pure black */  
}
```

CUSTOM FONT FACES

Two custom fonts are self-hosted as TrueType files uploaded to the WordPress media library. These are loaded via `@font-face` declarations in the theme CSS.

```
/* Primary heading font */  
@font-face {  
  font-family: 'Bahnschrift';  
  font-weight: 100;  
  font-display: auto;  
  src: url('BAHNSCHRIFT.ttf') format('TrueType');  
}  
  
/* Decorative display font */  
@font-face {  
  font-family: 'Picnic Caps';  
  font-weight: 400;  
  font-display: auto;
```

```
src: url('PicnicCaps.ttf') format('TrueType');  
}
```

IMPLEMENTATION NOTE

For a new website: If you want to replicate this theme, you will need to obtain the **Bahnschrift** and **Picnic Caps** font files. Bahnschrift is a Microsoft font that may have licensing restrictions for web use. Consider using a similar geometric sans-serif as an alternative (e.g., *DIN Next*, *FF Mark*, or *Montserrat*). For Picnic Caps, look for hand-lettered display fonts with a similar casual, rounded character (e.g., *Pacifico*, *Sacramento*, or *Caveat*).

08 USAGE RULES

COLOR CONTRAST & ACCESSIBILITY

When applying this brand palette to a new website, ensure all text-to-background color combinations meet WCAG 2.1 AA accessibility standards. Below are the key contrast ratios for the primary text and background pairings used on the Satiwa site.

BODY TEXT

8.8:1

AAA PASS

WHITE ON BLUE

4.6:1

AA PASS

DO

- ☒ Use the forest green (#1E4B1E) as the primary brand anchor color
- ☒ Maintain generous white space between sections (50px minimum)
- ☒ Use Bahnschrift in uppercase with letter-spacing for headings
- ☒ Keep body text at 15px with 1.86 line-height for readability
- ☒ Use the system font stack for all body/UI text
- ☒ Apply 2px border-radius consistently for buttons
- ☒ Use full-width hero sections with atmospheric photography
- ☒ Keep the color palette limited to the defined swatches

DON'T

- ☐ Introduce new colors outside the defined palette
- ☐ Use more than 2-3 typefaces on a single page
- ☐ Add underlines to links (they use color-only indication)
- ☐ Use large border-radius (keep at 2-4px maximum)
- ☐ Crowd sections together (maintain generous spacing)
- ☐ Use lowercase for hero headings on dark backgrounds
- ☐ Apply gradients or textured backgrounds to body content areas
- ☐ Mix multiple saturation levels of green without purpose

QUICK REFERENCE: TAILWIND CSS CONFIG

If implementing this brand in a Tailwind CSS project, use the following configuration as a starting point to map the Satiwa palette to Tailwind utility classes.

```
// tailwind.config.js
module.exports = {
  theme: {
    extend: {
      colors: {
        satiwa: {
          blue: '#0170B9',
          green: '#1E4B1E',
          'green-mid': '#265B1F',
          sage: '#C0C4AA',
          charcoal: '#4B4F58',
        },
      },
      fontFamily: {
        heading: ["Bahnschrift", 'sans-serif'],
        display: ["Picnic Caps", 'sans-serif'],
      },
      borderRadius: {
        'brand': '2px',
      },
    },
  },
}
```
